Frederick, Maryland 21702

Dear Mr. Weisberg,

I recently (last weekend) discovered your new book, Case Open. I have thoroughly enjoyed it. I am glad someone has seen the need to rebut such a book.

This is my third letter to you, but the first in over ten years. I teach school now in southern Oklahoma. My reason for writing you concerns another travesty of research entitled Conspiracy of One. I read this book almost four years ago when it was first published. I was so disgusted with what Moore calls "research" that I felt the need to document his falsifications, quotes from other authors which he took out of context, and numerous documentation errors. In the first reading I only found 59 such errors. I also found several places in his book where Moore actually contradicts himself!

I have enclosed for your enjoyment a copy of my letter to Moore concerning his book. I have also enclosed a sample of my list of Moore's "errors." My question to you is do you think there is any chance I might get this published, either in a periodical or as a book? I firmly believe that something should be published to inform the general public of Moore's distortion of the facts. Perhaps Carroll and Graf?

I would appreciate any help you can offer. You may also be interested to know that I confronted Jim Moore about his book at the 1991 Assassination Symposium on Kennedy (ASK) held in Dallas. Cyril Wecht certainly enjoyed it when I pointed out that Moore's star witness on JFK's head wounds was an urologist!

I look forward to hearing from you. My current address is at the top of this page.

Thank You!
